

Café G[®]

Stock Printed Foam Cups

Put an end to double cupping

Customers shouldn't need to use two paper cups in order to drink a single hot beverage. Dart's Café G stock printed foam cups:

- Provide increased insulation over paper cups.
- Reduce heat transfer from the beverage to your hand.
- Maintain beverage quality and taste.
- Help control packaging costs by eliminating the need for double cupping.

The Café G design offers an upmarket look that incorporates a subtle colour coding system to help customers and employees identify the correct cup size. Simply look for the colour of the cup, saucer, and napkin in the diamond. You'll also find a variety of speciality lids available for Café G, including our cappuccino lid, to create the perfect combination for gourmet coffee to go.
